Summary

Full Stack Developer experienced in building web applications and REST APIs using Python, FastAPI, Flask and React. Skilled in RAG systems, graph databases, backend development and cloud deployment.

Education

IIT Madras — Online
Bachelor of Science in Data Science, Minor in Programming — *May 2023 – May 2027*

Guru Nanak Dev University — Amritsar, Punjab
Bachelor of Technology in Electronics and Computer Engineering — *July 2023 – July 2027*

Experience

Frontend Team Lead (Interim) — April 2026 – Aug. 2026
Zurfte Empowercare Foundation – Vaibez Mobile App — *Remote*

- Led 6 frontend developers on a React Native (Expo) and TypeScript app, tracking 30+ tasks and driving delivery across the onboarding, search, video and notification features.
- Delivered 15 user journeys covering onboarding, search, video uploads and password recovery using React Navigation, Zustand for state management and React Query for data fetching and caching.
- Reviewed pull requests, enforced CI checks (TypeScript, ESLint, Jest) and coordinated backend API integration.

Backend Web Dev Intern — June 2025 – Aug. 2025
Nobel Navigators, Washington Blvd — *Remote*

- Mentored 10+ peers in Python and Flask over 5+ sessions; contributed to backend development across 3+ projects.

Projects

ResolveAI Platform | *Python, FastAPI, LangChain, Groq API, FAISS, SQLite* — Live Demo

- Answers sit buried in long PDFs. Built a RAG platform (FastAPI, LangChain, FastEmbed, FAISS) with auth and chat history; swapped PyTorch for FastEmbed to fit Render's 512 MB limit.
- Source-aware PDF answers in under 3 seconds, designed to run as an AI chatbot on company websites.

Strata - Ownership Graph Platform | *Python, FastAPI, CognoDB (Graph DB), Groq API, Docker* — Live Demo

- Layered holdings hide who controls a company and OFAC 50% rule breaches. Built multi-hop Cypher traversals over a graph model, plus a Groq natural language interface over 5 pre-tested queries.
- Surfaces beneficial owners and potential OFAC violations, validated by 39 passing tests.

AI Scam Detection System | *Python, Flask, SQLite, Google OAuth* — Live Demo

- Scams are hard to spot on sight. Built a rule-based detector with 25+ heuristic checks (credential harvesting, urgency, impersonation) and URL/domain forensics; secured logins with Google OAuth.
- 85% accuracy with explainable risk scoring.

Technical Skills

Languages: Python, JavaScript, TypeScript, HTML5, CSS
Frameworks & Libraries: React Native, Expo, React, FastAPI, Flask, Zustand, React Query, LangChain, LangGraph, Jinja2, SQLAlchemy, Tailwind CSS, Vite
Databases & AI Tools: PostgreSQL, SQLite, Redis, ChromaDB, FAISS, FastEmbed, Hugging Face, Groq API, Google Gemini API, Neo4j/Cypher, CognoDB
Tools & Concepts: Git, GitHub, Docker, Kubernetes, Render, REST APIs, WebSockets, RAG Systems, Authentication, Vector Embeddings, JWT, OAuth, CI/CD

Certifications

JPMorgan Chase & Co. | *Software Engineering Virtual Experience Program (Forage)*

Python Programming | *Udemy* | *2025*
